IMPORTANT NOTIFICATION

International application No.

PCT/EP 03/10245

International filing date (day/month/year)

15.09.2003

Priority date (day/month/year)

16.09.2002

Applicant

TELEFONAKTIEBOLAGET L M ERICSON et al.

1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

**4. REMINDER**

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

Name and mailing address of the international  
preliminary examining authority:

**INTERNATIONAL PRELIMINARY  
EXAMINATION REPORT**

International application No. PCT/EP 03/10245

**I. Basis of the report**

1. With regard to the **elements** of the international application (*Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)*):

**Description, Pages**

1-9 as originally filed

**Claims, Numbers**

1-10 as originally filed

**Drawings, Sheets**

1/1 as originally filed

2. With regard to the **language**, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language: , which is:

- ☐ the language of a translation furnished for the purposes of the international search (under Rule 23.1(b)).  
☐ the language of publication of the international application (under Rule 48.3(b)).  
☐ the language of a translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.  
☐ filed together with the international application in computer readable form.  
☐ furnished subsequently to this Authority in written form.  
☐ furnished subsequently to this Authority in computer readable form.  
☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.  
☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. The amendments have resulted in the cancellation of:

- ☐ the description, pages:  
☐ the claims, Nos.:  
☐ the drawings, sheets:

**INTERNATIONAL PRELIMINARY  
EXAMINATION REPORT**

International application No. PCT/EP 03/10245

5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)).

*(Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.)*

6. Additional observations, if necessary:

**V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

1. Statement

Novelty (N)	Yes: Claims	1-10
	No: Claims	
Inventive step (IS)	Yes: Claims	1-10
	No: Claims	
Industrial applicability (IA)	Yes: Claims	1-10
	No: Claims	

2. Citations and explanations

**see separate sheet**

- 1 Reference is made to the following document:

D1: LINDOFF B: "Using a direct conversion receiver in edge terminals - a new DC offset compensation algorithm" 11TH IEEE INTERNATIONAL SYMPOSIUM ON PERSONAL INDOOR AND MOBILE RADIO COMMUNICATIONS, 18 September 2000 (2000-09-18), - 21 September 2000 (2000-09-21) XP010520777 London, UK,

2. The independent claims 1 and 8 contain terms which have no well-recognised meaning in the technical field of channel estimation, leaving the reader in doubt as to the meaning of the technical features to which they refer and thereby rendering the definition of the subject-matter of said claims unclear, Article 6 PCT. These terms are the following: "trend matrix", "path-trend vector" and "neutralized regression matrix".
3. Despite of the clarity problems cited above, if the unclear terms are interpreted in the light of the description (see pages 5 to 8) the claims contain new, inventive and industrially applicable subject matter according to Article 33 (2), (3) and (4) PCT. The details are given in the following.
- 3.1 The application relates to a method (claims 1 and 8) to estimate and remove the DC offset in a GSM/EDGE receiver.
- 3.2 Such a method are disclosed by D1, which is considered the closest prior art.
- 3.3 The subject-matter of independent claims essentially differs from D1, in that D1 does not use "neutralized" (meaning DC-free) inputs and outputs for compensation of the DC offset. D1 represents the prior art solution to the problem which consists on estimating jointly DC offset and radio channel.
- 3.4 The problem solved by these new features can be considered as how to avoid the computational complexity which is inherent to the joint estimation method. The solution proposed by the application allows for a separate estimation with the additional advantage that the path trend vectors can be precalculated.
- 3.5 The new features are neither disclosed nor rendered obvious by any of the documents cited in the International Search Report. There are no indications that

**INTERNATIONAL PRELIMINARY  
EXAMINATION REPORT - SEPARATE SHEET**

---

International application No. PCT/EP 03/10245

a skilled person would address the problem. Therefore, the present solution should be considered as inventive.
